

## 2025/2026 Autumn Chemical Physics 1c. 1gr.

| Monday        |                                                                                                |                                                                         |
|---------------|------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|
| 11:00 - 15:00 | Non-equilibrium Statistical Physics (lectures and seminars)<br>Darius Abramavičius, Prof., Dr. | 207, Saulėtekio al. g. Palace III (FF)                                  |
| 15:00 - 17:00 | Physical Kinetics (LECTURE)<br>Stepas Toliautas, Assoc. Prof., Dr.                             | 815, Saulėtekio al. g. Palace III (FF)                                  |
| 17:00 - 19:00 | Physical Kinetics (seminar)<br>Stepas Toliautas, Assoc. Prof., Dr.                             | 815, Saulėtekio al. g. Palace III (FF)                                  |
| Tuesday       |                                                                                                |                                                                         |
| 10:00 - 12:00 | Photobiology (LECTURE)<br>Saulius Bagdonas, Prof., Dr.                                         | 511, Saulėtekio al. g. Palace III (FF)                                  |
| 12:00 - 14:00 | Photobiology (seminar)<br>Saulius Bagdonas, Prof., Dr.                                         | 511, Saulėtekio al. g. Palace III (FF)                                  |
| 14:00 - 17:00 | Chemical Physics (LECTURE)<br>Kęstutis Aidas, Prof., Dr.                                       | 215, Saulėtekio al. g. Palace III (FF)                                  |
| Wednesday     |                                                                                                |                                                                         |
| 10:00 - 12:00 | Chemical Physics (seminar)<br>Kęstutis Aidas, Prof., Dr.                                       | 704, Saulėtekio al. g. Palace III (FF)                                  |
| 12:00 - 14:00 | Physics of Surface and Nanosystems (LECTURE)<br>Gediminas Niaura, Prof., Dr.                   | NFTMC (NFTMC)                                                           |
| 14:00 - 18:00 | Simulation of random actions (lectures and seminars)<br>Jevgenij Chmeliov, Assoc. Prof., Dr.   | 510 Prof. Adolfas Jucys classroom,<br>Saulėtekio al. g. Palace III (FF) |
| Thursday      |                                                                                                |                                                                         |
| 10:00 - 13:00 | Physical electrochemistry (LECTURE)<br>Lina Mikoliūnaitė, Assoc. Prof., Dr.                    | 207, Saulėtekio al. g. Palace III (FF)                                  |
